science+

workshop overview

In this workshop you will:

- visit stations that highlight some of our Ward's elementary kit activities;
- take home easy to implement activities for use in your classroom;
- share ideas and suggestions with and for your colleagues
- have fun
- win prizes

hand's on activities

We may feel hands on activities are:

- To messy
- To time consuming – to prepare, to do
- To many materials, need special/expensive materials

But, we know hands on activities:

- Help students learn and retain
- Get students involved and active in learning

stations

9 stations – multiple set ups at each Station Table
6 minutes per station

- Air Takes Up Space
- Seeing the Light
- Dark or Light? Day or Night?
- Feather Study
- The Flying Paper Clip
- Bird Beak
- Mechanical Weathering
- Sediment Settler
- Chromatography

Each station has complete instructions to complete the activity.
Feel free to ask questions.
Share ideas and suggestions.

wrap up

- Suggestions to share?
- Great lessons you have used to help teach difficult topics?
- Ideas for materials that may be easier to find?
- Helpful Hints to share?

- Raffle Time!!
